

INTERMEDIATE WEB DESIGN

assignment 1

HTML AND CSS REFRESHER

Identify a website for a company or organization that does not currently have a blog. Design a mockup in Photoshop for a blog for that entity which adheres to the same visual language as the entity's primary website. The mockup should include both a homepage and one subpage (an individual blog post). Lastly, convert that design into HTML and CSS. *Note: the target device is a desktop or laptop computer; in a future assignment, we will adapt the design for mobile devices.*

Your homepage should list at least three articles with a paragraph or two of text for each article (which can be Greeked). Each article should be accompanied by one or more images. The design should also include standard elements such as a logo, navigational links, search facility, etc. Feel free to take other liberties with the content or design that may be aligned with the branding or philosophy of that entity.

Deliverable: two webpages (homepage and subpage) and all dependent assets (such as imagery, CSS files, fonts, etc.).

OBJECTIVE

The purpose of this assignment is to re-acquaint students with HTML and CSS. The assignment will be submitted via GitHub, and this will also give students an opportunity to use and get in the habit of using version control software.

INTERMEDIATE WEB DESIGN

DEADLINE

This assignment is due at the beginning of the next class. Please publish your files to your GitHub homework repository in a sub-folder called “O1 assignment.”

CLASS INFO

CMP 3011-C1
2 Credits
Spring 2015

WEIGHT

This assignment carries a weight of .8.

MEETING TIME

Saturdays
1:00pm - 4:15pm
